# Test Automation

Talk & Demo

# Test Automation

WHERE

WHAT

WHEN

WHY

HOW

WHO

# WHAT is it?

⇒ **test automation** is the use of special software (separate from the software being tested) to control the execution of tests and the *comparison of actual outcomes with predicted outcomes*.

WHY do we  
need it?

# Why to automate?

Cheaper

Reduced human and technical risks

Faster

Fast feedback

Reliable

Increased test coverage

Motivation

# What to automate?

Non-functional requirements

Tests you need to run several times

Smoke tests

API testing

Data driven testing

Regression Tests

OS & Browser combinations

**ONE DOES NOT SIMPLY**

**AUTOMATE ALL OF THE APPLICATION**

What NOT  
to  
automate?

→ Unstable design

# What NOT to automate?

- Unstable design
- Usability and UX

# What NOT to automate?

- Unstable design
- Usability and UX
- Uncommon processes

# What NOT to automate?

- Unstable design
- Usability and UX
- Uncommon processes
- Low return on investment

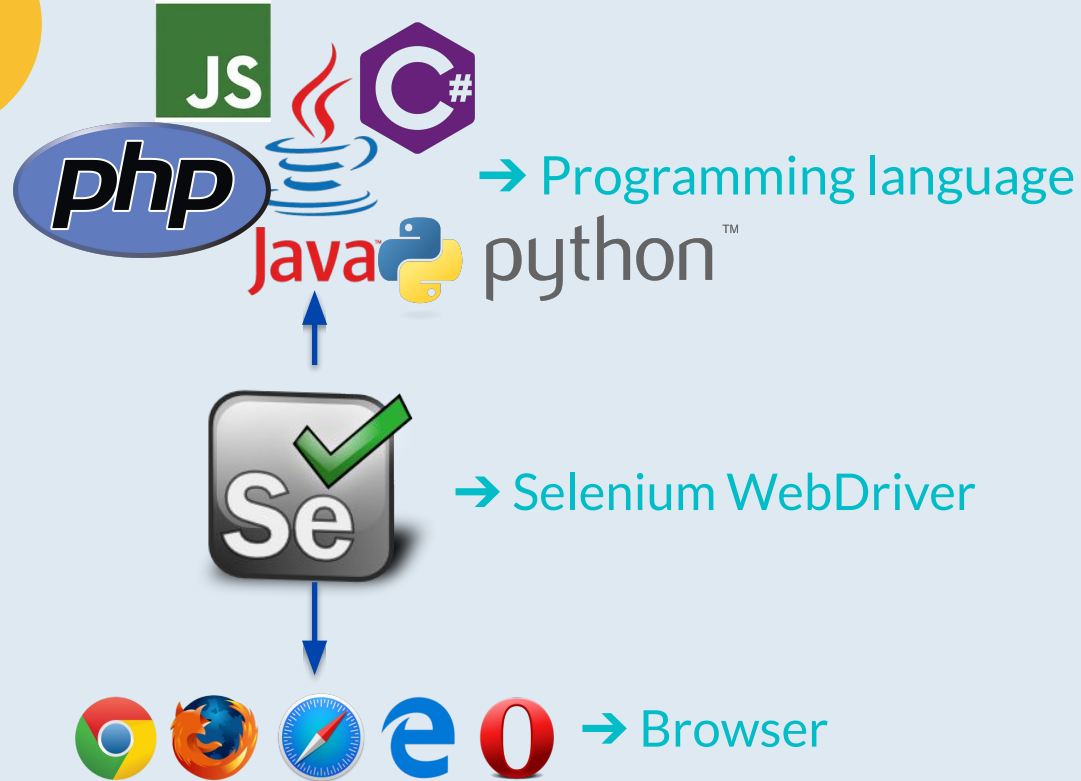

# What NOT to automate?

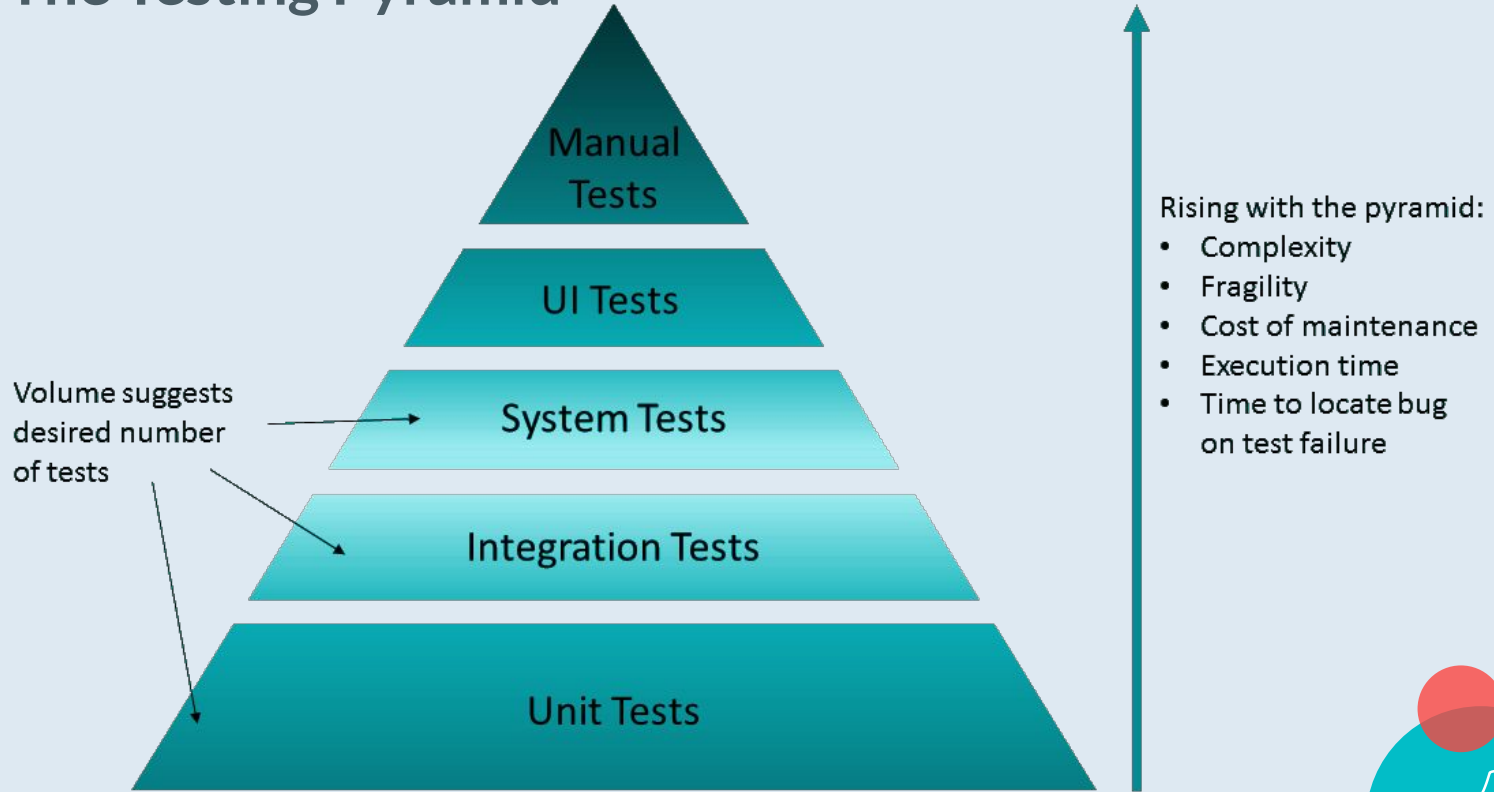

- Unstable design
- Usability and UX
- Uncommon processes
- Low return on investment
- Highly complex processes

# HOW to automate?

# The Testing Pyramid

- ✓ There are tests that can't be automated and there are tests that can't be run manually.
- ✓ Just because a test is automatable doesn't necessary mean it should be automated!
- ✓ Remember, test tools aren't magic – but properly implemented they can work wonders!

*“Automation should not be used as a replacement of manual testing, but rather an enhancement of it.”*

**- James Bach -**

Why?

What to automate?

What NOT to automate?

Serenity <sup>BDD</sup>  
TALK & DEMO

- open source library
- clear **structure** and **maintainable** acceptance criteria
- good **reporting** → living documentation
- **readability**

Compatible frameworks:

- Serenity with JBehave
- Serenity with Cucumber
- [Serenity with JUnit](#)
- Serenity with Screenplay Pattern

# SETUP ENVIRONMENT & PREREQUISITES

*Maven is Java based tool, so the very first requirement is to have JDK installed in your machine.*

Download and install **Java JDK**:

<https://www.oracle.com/java/technologies/javase-downloads.html>

Download and install **Apache Maven**:

<http://maven.apache.org/download.cgi>

Download and install **Mozilla Firefox**:

<http://www.mozilla.org/>

# SETUP ENVIRONMENT - STEPS

**Step 1** - verify Java installation in your machine `c:\>java -version`

**Step 2** - set JAVA environment: `JAVA_HOME` to `C:\Program Files\Java\jdk1.6.0_21`

**Step 3** - download Maven archive: <http://maven.apache.org/download.html>

**Step 4** - extract the Maven archive: `C:\Program Files\Apache Software Foundation\apache-maven`

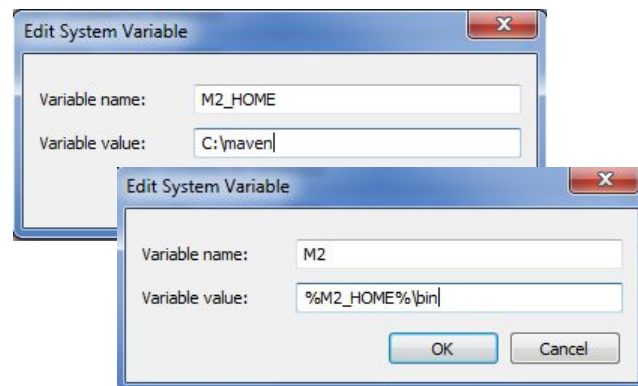

# SETUP ENVIRONMENT - STEPS

24

Start → Control Panel → System and Security → System → Advanced system settings → Environment Variables

## Step 5 - set Maven environment variables:

## Step 6 – set Path for Maven and Java

## Step 7 - verify Maven installation:

c:\> mvn --version

# 1.1 Pages Content

WebElement  
mapping

Methods/actions  
definitions

```
@DefaultUrl(helpers.Constants.url)
public class HeaderPage extends PageObject {

    @FindBy(className = "navbar-brand")
    private WebElementFacade logo;

    @FindBy(id = "searchboxTrigger")
    private WebElementFacade searchBox;

    @FindBy(css = ".searchbox-submit-button")
    private WebElementFacade searchIcon;

    @FindBy(id = "my_account")
    private WebElementFacade myAccount;

    @FindBy(id = "my_wishlist")
    private WebElementFacade myWishlist;

    @FindBy(id = "my_cart")
    private WebElementFacade myCart;

    public void type_keywords(String keyword) {
        searchBox.type(keyword);
    }

    public void search() {
        searchIcon.waitForClickable();
        searchIcon.click();
    }

    public void go_to_cart() {
        myCart.waitForClickable();
        myCart.click();
    }
}
```

## 2. STEPS

33

### What is a step ?

- A stage in a process
- One of a series of actions, processes, or measures taken to achieve a goal.

## 2.1 Steps Content

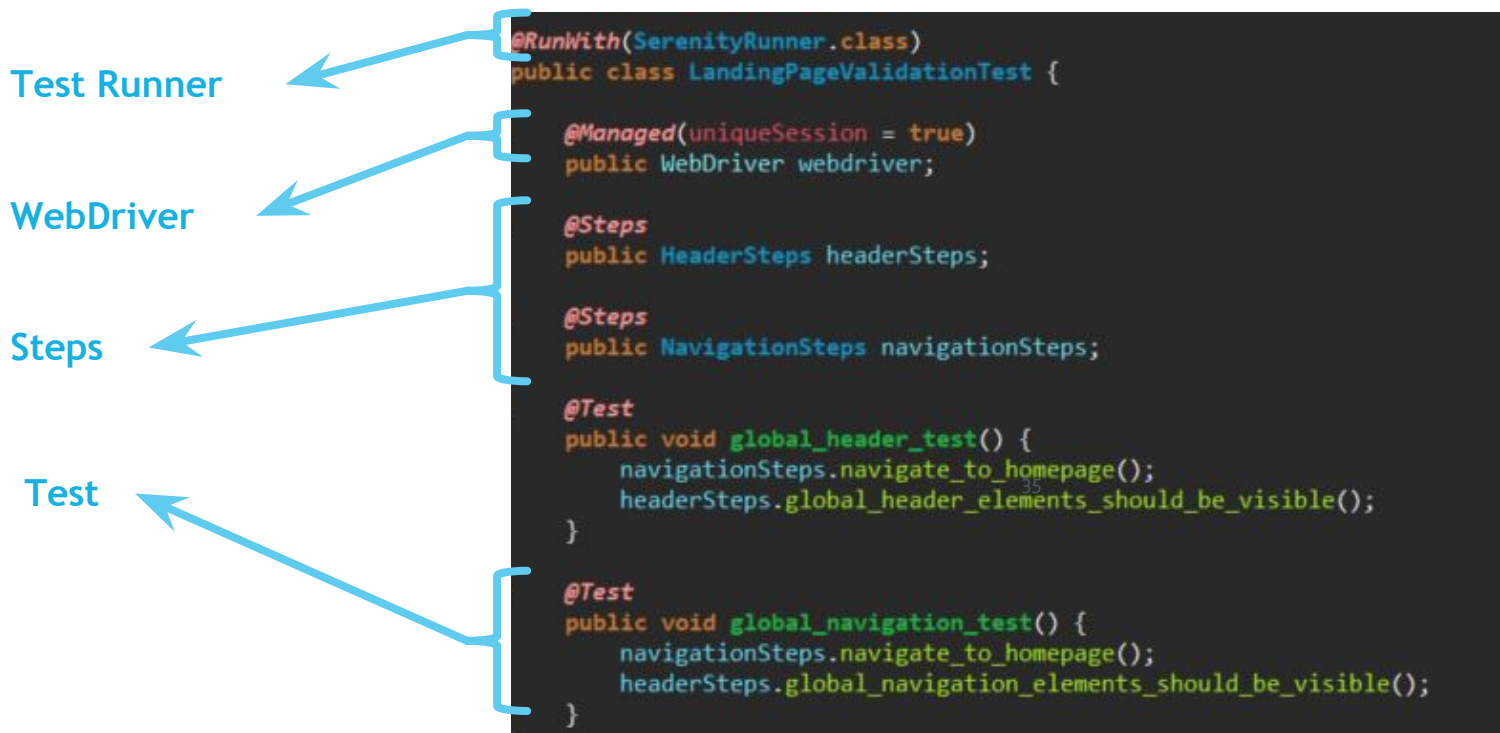

Page declarations

Step Annotation

StepGroup

```
public class HeaderSteps {  
    HeaderPage headerPage;  
    SearchResultsPage searchResultsPage;  
    GlobalNavigationPage globalNavPage;  
  
    @Step  
    public void navigate_to_shopping_cart() {  
        headerPage.go_to_cart();  
    }  
  
    @Step  
    public void search_product(String productName) {  
        headerPage.type_keywords(productName);  
        headerPage.search();  
        assertTrue(searchResultsPage.get_search_results_page_term().contains(productName));  
    }  
  
    @Step  
    public void global_header_elements_should_be_visible()  
    {  
        assertTrue(headerPage.my_account_is_visible());  
        assertTrue(headerPage.my_cart_is_visible());  
        assertTrue(headerPage.my_wishlist_is_visible());  
    }  
  
    @Step  
    public void global_nav_help_link_should_be_visible()  
    {  
        assertTrue(globalNavPage.help_link_is_visible());  
    }  
  
    @Step  
    public void global_nav_products_link_should_be_visible()  
    {  
        assertTrue(globalNavPage.products_link_is_visible());  
    }  
  
    @Step  
    public void global_nav_promotions_link_should_be_visible()  
    {  
        assertTrue(globalNavPage.promotions_link_is_visible());  
    }  
  
    @StepGroup  
    public void global_navigation_elements_should_be_visible() {  
        global_nav_help_link_should_be_visible();  
        global_nav_products_link_should_be_visible();  
        global_nav_promotions_link_should_be_visible();  
    }  
}
```
